Gallagher Benefit Services, Inc.
thinking ahead

Leading-Edge Technology Solutions

At Gallagher Benefit Services (GBS), our innovative, value-added technology services stand out as truly unique in the industry.

Simply by partnering with us, you will be introduced to a wealth of insurance related tools and information. These employee benefits services enhance our commitment to providing you the latest in strategic planning, expertise, innovation and technology.

Benefits & HR Resources

Online Client Service Center

This personalized online client service center delivers secure, electronic access to the latest information and tools you need to effectively manage your company's HR and employee benefit needs. Core features include: personalized workspace; a directory of your individual documents that you and your GBS team can share; a powerful compliance and HR search engine; and access to your benefit plans.

This tool also delivers HR, benefits, compensation, employment and regulatory issues information. You can access model forms and policies, law summaries, and get responses to any HR question.

Employee Communications

Connect2MyBenefits

Our Connect2MyBenefits employee intranet website offers your employees direct access to comprehensive company, human resource, and benefits information. It also offers calculators and online resources to help you educate and empower your employees.

Total Compensation Statements

We offer customized employee benefit statements. These "total compensation" statements effectively communicate the shared employer and employee costs of benefits.

GBS Viewpoints

Our employee surveys provide you with an opportunity to accurately understand employees' perceptions, your strengths and weaknesses and determine if changes are needed.

Benchmarking & Claims Analysis

Decision Master Warehouse

Our Decision Master Warehouse application helps us meet your data reporting and analysis needs. With it, we can detect problems with medical and Rx utilization and costs, isolate causes of utilization problems, and experiment with plan design alternatives to see how plan changes will impact cost and participants. Our objective is to assist you in creating a long-term strategy for your health plan (large groups only).

PlanAdvisor

Our PlanAdvisor tool allows us to analyze your benefits plan costs against reliable benchmark information, project the impact of medical plan design changes and streamline the plan selection process for your employees.

Benefits Administration

Online Enrollment, Consolidated Billing & Benefits Administration

GBS is committed to providing our clients with robust, web-based employee benefits administration systems that can be customized to fit your company's needs. We offer several solutions based on your objectives and budget.

Online Application Processing

We offer a streamlined underwriting process for small groups. Employees fill out their and any dependent health information one time via a secure website and print out a number of completed carrier health applications (small groups only).
